Duration	2 mins 31 secs
Grade	**14.00** out of 15.00 (**93.33**%)

Question **1**

Correct

Mark 1.00 out of 1.00

What is searching in the context of computer science?

- a. Determining whether an element is present in a list ✓
- b. Sorting elements in a list
- c. Deleting elements from a list
- d. Inserting elements into a list

Question **2**

Correct

Mark 1.00 out of 1.00

What is the time complexity of binary search in the worst case?

- a. O(log n) ✓
- b. O🥊
- c. O(n log n)
- d. O(1)

Question **3**

Correct

Mark 1.00 out of 1.00

Which method of searching involves sequentially comparing each element until a match is found?

- a. Hashing
- b. Jump search
- c. Linear search ✓
- d. Binary search

Question **4**

Correct

Mark 1.00 out of 1.00

In binary search, what happens if the middle element does not match the target element?

a. The list is sorted
b. The search stops
c. The search continues from the beginning
d. The search continues in the left or right sublist ✓

Question **5**

Correct

Mark 1.00 out of 1.00

If the target element is greater than the middle element in binary search, where does the search continue?

a. In the right sublist ✓
b. In the left sublist
c. In the middle of the list
d. At the beginning of the list

Question **6**

Correct

Mark 1.00 out of 1.00

In which type of search is the list divided into smaller sublists during the search process?

a. Hash search
b. Binary search ✓
c. Linear search
d. Sequential search

Question **7**

Correct

Mark 1.00 out of 1.00

What is the key characteristic of binary search?

a. It always starts from the beginning of the list
b. It compares elements sequentially
c. It works on unsorted lists
d. It can be applied only if the list is sorted ✓

Question **8**

Incorrect

Mark 0.00 out of 1.00

What happens in a binary search if the list has an even number of elements?

- a. The lower middle element is chosen as the middle element ✗
- b. The search stops
- c. The middle element is chosen randomly
- d. The higher middle element is chosen as the middle element

Question **9**

Correct

Mark 1.00 out of 1.00

The average case occurs in the linear search algorithm

- a. When the item is not the array at all
- b. When the item is the last element in the array
- c. When the item is somewhere in the middle of the array ✓
- d. Item is the last element in the array or item is not there at all

Question **10**

Correct

Mark 1.00 out of 1.00

_____ search takes a sorted/ordered list and divides it in the middle.

- a. Hash
- b. Both (1) & (3)
- c. Linear
- d. Binary ✓

Question **11**

Correct

Mark 1.00 out of 1.00

During a binary search, what happens if the target element matches the middle element?

a. The search continues in the left sublist
b. The search continues in the right sublist
c. The search ends successfully ✓
d. The list is sorted

Question **12**

Correct

Mark 1.00 out of 1.00

Which of the following is a limitation of binary search?

a. It does not work with negative numbers
b. It can only be applied to large lists
c. It is slower than linear search for small lists
d. It requires the list to be sorted ✓

Question **13**

Correct

Mark 1.00 out of 1.00

What is the best-case time complexity of linear search?

a. O🥊
b. O(1) ✓
c. O(n log n)
d. O(log n)

Question **14**

Correct

Mark 1.00 out of 1.00

Which of the following is a conventional searching technique?

a. Hashing
b. Binary search
c. Linear search ✓
d. Dynamic search

Question **15**

Correct

Mark 1.00 out of 1.00

In linear search, if the target element is not found in the list, what is the result?

a. The last element is returned
b. The first element is returned
c. The search is considered unsuccessful ✓
d. An error is raised
